

# Streamlined Permit Automation

Navigar's Permit Automation system streamlines the permitting process from application submission all the way through project completion. Your local government will have status reports, visibility into permits currently in the process, reporting and analytics, reminders of tasks due, checks and balances to ensure any potential problems are proactively highlighted.

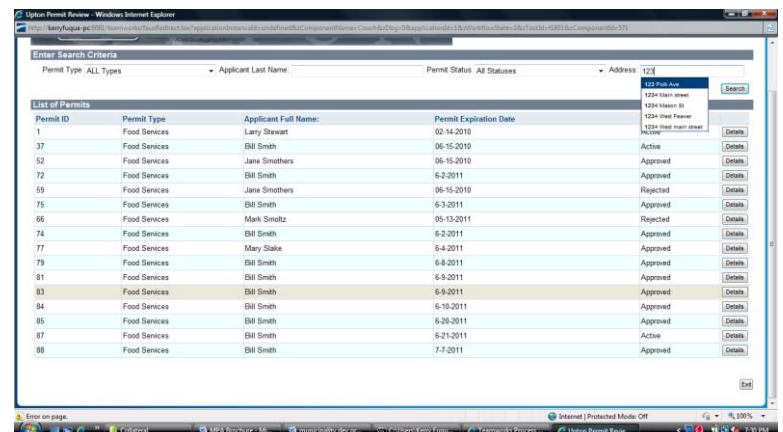

## BENEFITS

- Reduced permitting time
- Improved record keeping
- Enhanced departmental communication
- Improved efficiency

Intuitive, easy to use permit applications can be completed by applicants or by town officials that can be customized to meet local requirements.

Previously issued permits can be easily found based on address, applicant name, or permit type.

Navigar's web-based Permit Automation System will automate and streamline the permit process for cities and towns with:

- ✓ Visibility into permit activity by specified address, applicant, or permit type
- ✓ Inter-departmental Tracking to determine which departments have reviewed and approved applications and view corresponding comments
- ✓ Automated document distribution to allow users to associate documents with any given permit
- ✓ Automated task and expiry date reminders to automatically remind staff of approaching deadlines or task reminders
- ✓ Online application status checking giving public visibility into the status of their permit and plan review
- ✓ Historical record keeping of approval process
- ✓ Online application submission that empowers the public to submit permit applications over the internet, extending the reach of local government and making the process easier for citizens
- ✓ Quick access to view new and existing permits that allows staff to quickly focus on reviewing and responding to applications
- ✓ Adaptable reports that allows staff to meet departmental needs for regular monthly reports, state required reports, or adhoc reports
- ✓ Integration with other Financial and Government Management systems
- ✓ Fee Calculation
- ✓ GIS Integration for reference and ability to generate abutters lists
- ✓ Scalability to expand system capabilities

## HIGHLIGHTS

- *Intuitive for all users*
- *Flexible and designed for customization of the process to meet each municipality's needs*
- *Allows concurrent review of permit applications and plans by all departments for efficient and streamlined processing*
- *Reduces staff work load and duplication of effort by interfacing with other departments and databases*

### About Navigar

Through our proven methodology and the use of new and existing technologies Navigar improves business processes resulting in cost savings, improved controls, and transparency.
